

New improved Right Decision Service (RDS)

Quicker, easier access to evidence-based tools for day to day decisions

We've updated Right Decision Service look and feel and its functionality, so that you can:

- search more quickly and accurately across more resources.
- 'favourite' toolkits for one-click access.
- filter and sort results, remove password-protected resources
- see publication details and review dates for more pages
- browse toolkits by organisation, condition, care setting, professional and population groups
- collaborate for consistency by re-using and customising national and local content.

NHS Scotland logo now included

The screenshot shows the NHS Right Decision Service interface. At the top, the NHS Scotland logo is included. The navigation bar includes links for All resources, Organisations, Topics, Learning & support, How to deliver RDS tools, and Feedback. A search bar is present with a toggle for 'All content' and 'Toolkit titles'. A yellow banner for 'Announcements and latest updates' is below the search bar. The 'Favourite toolkits' section shows a toolkit for 'Mental health in pregnancy and after birth (SIGN)'. The 'Browse toolkits' section on the left lists filters for Organisations (Local NHS Boards and Health & Social Care Partnerships) and Topics (Care Settings). The main content area displays search results for '4AT delirium screening tool', '7 steps to future care planning', and 'Aberdeenshire - Living well with dementia'. Annotations highlight the toggle between searching for all content and toolkits, the search bar, the favourite toolkits section, the browse and filter options, the hide password-protected content checkbox, the sort by dropdown, the search results categorisation into 'All', 'National', and 'Patients & public' tabs, the more user-friendly search records, and the NHS Lothian logo.

Annotations on the screenshot:

- Toggle between searching for all content and toolkits
- Now only one search box
- Favourite toolkits appear here
- Browse and filter options
- Options to sort results
- Hide password-protected content
- Search results categorised into 'All', 'National' and 'Patients & public' information tabs
- More user-friendly search records
